

# Quicklink ST55

Video and audio conferencing contributions from any desktop or mobile device.

Unlimited audio/video or audio only contribution links from a web browser, delivered quickly and easily back to the central studio. Contributors can be invited via SMS, WhatsApp or email and can send content to the studio remotely and easily using any device where a simple Chrome/Safari browser can be opened, no software downloads are necessary.

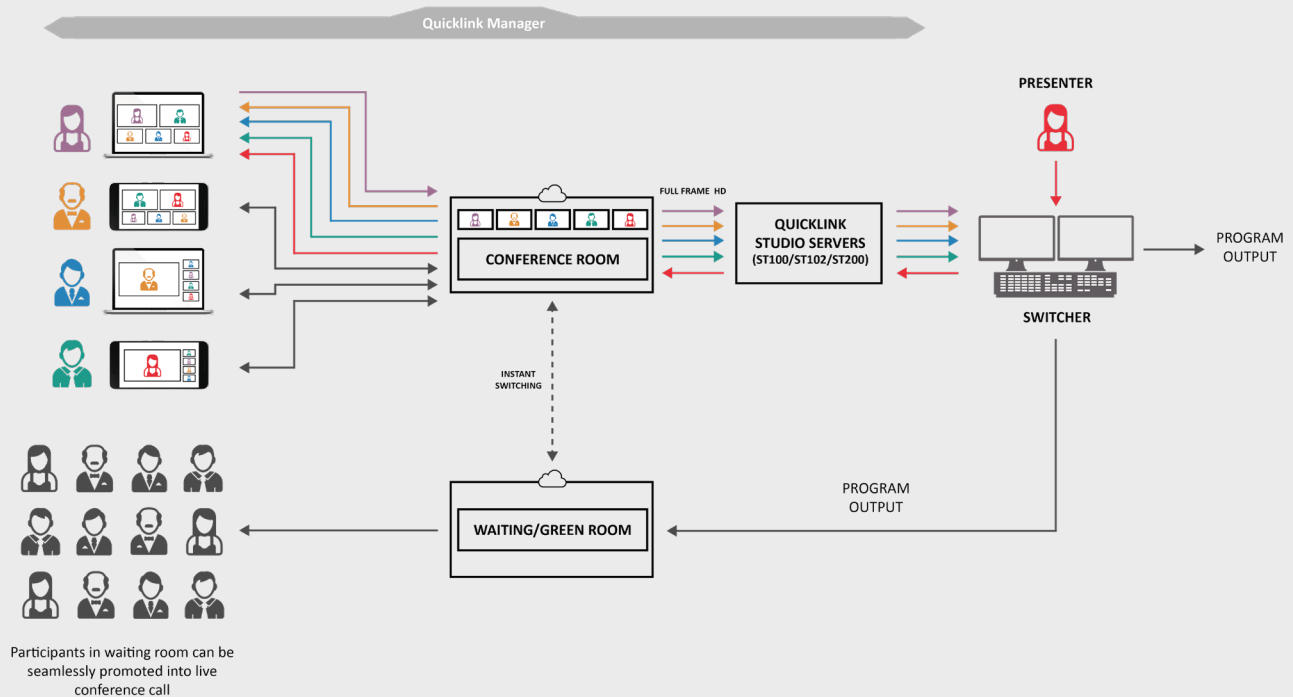

Cloud advanced firewall punch-through with automatic fallback to Quicklink Relay Services guarantees connectivity on the most challenging and secured networks.
