# Quicklink STS410

Achieve a full production workflow with the STS410, an all-in-one hybrid switcher. Pre-screen, control and manage guest participants in a conferencing room with additional participants that can view and listen to the live program in a virtual waiting room.

This powerful hybrid switcher also includes the power of the cloud with custom overlays, as well as streaming and professional hardware broadcast outputs.

- ▶ Guest participants in a mix-minus Conference room with independent outputs, plus program and preview as NDI/RTMP/SRT
- ▶ Support for simultaneous video conferencing call inputs including Microsoft Teams, Zoom, Discord and Slack
- ▶ Native support for up to 4 Skype callers with included Skype TX integration

- ▶ Additional streaming outputs with independent configuration and simultaneous program output record
- ▶ HD-SDI and HDMI input and output
- ▶ Cloud-based controller
- ▶ Presentation or screen sharing in full-frame rate HD resolution
- ▶ Independent HD recording for each guest participant
- ▶ Third-party integration with Singular.live and Flowics

Quicklink Manager

The Quicklink Manager allows simple and intuitive management of links and contributors from one central portal, from any global location, using a secure Chrome web browser. Various layers of operational security including two factor authentication and end to end encryption ensure the highest levels of data security and integrity.
